“ We have been using Rodin[®] Sculpture for 14-months for all of our temporary restorations, both tooth and implant-supported; we’ve had no failures on long-term tooth-supported temporary restorations and minimal complications with implant-supported temporary restorations. ”

Lee Culp, CDT and CEO of Sculpture Studios
LMT Magazine, November/December 2022

Rodin[®] Sculpture

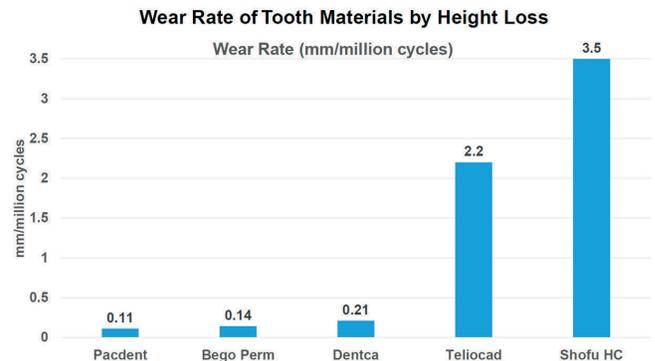

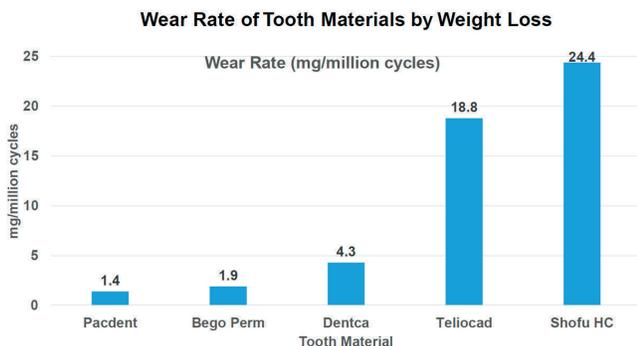

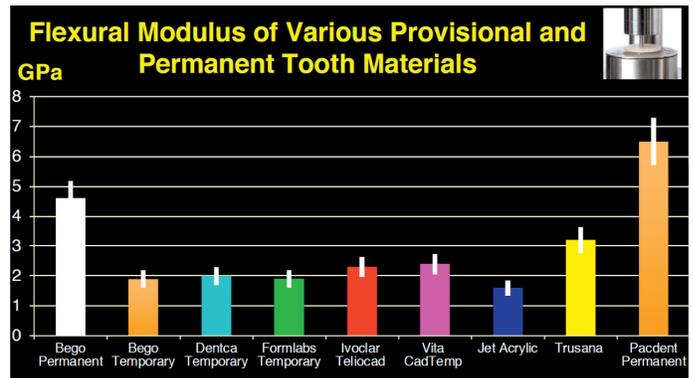

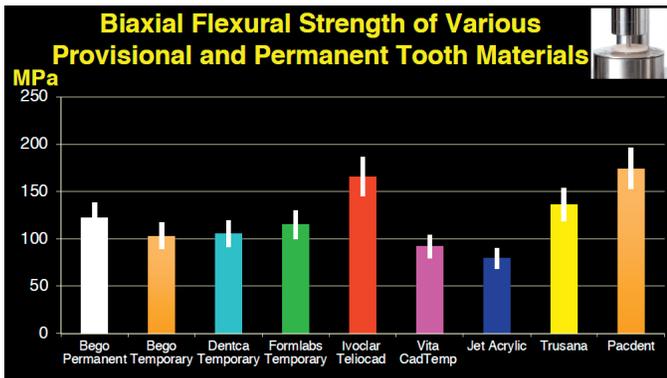

Ceramic Nano-Hybrid Resin

Rodin[®] Sculpture features the highest flexural strength (MPa) and modulus (GPa) of any long-term/ permanent restoration, allowing technicians to produce life-like permanent restorations that in return streamline the production process and reduce manufacturing costs.

"No longer milling long-term provisionals as I print them all with Rodin[®] Sculpture!"
- Lee Culp, CDT
