

Soft Reline Kit

BENEFITS & FEATURES

Exceptional Adhesion and Tear Strength:

Provides unmatched adhesion and tear strength for 3D denture base polymers and traditional PMMA materials to ensure a secure and rip free bond

Superior Performance:

Advanced formulation exceeds the capabilities of traditional soft reline materials and is designed for enhanced durability and comfort, ensuring a long-lasting and comfortable fit.

Ease of Workflow:

Streamlines the denture reline process, making it efficient and to get patients in and out, minimizing chair time.

Esthetic and Patient Comfort:

Designed to blend seamlessly with the denture base, providing a natural look and feel. The result is a functional, comfortable, and visually appealing soft reline that patients can wear with confidence.

APPLICATIONS

3D Printed Dentures

PMMA Dentures

Acrylic Dentures

	Rodin Soft Reline	Acrylic Soft Reline
Configuration	Automix closed-cartridge delivery; consistent, clean, minimal waste	Powder & liquid mix; variable ratios, messy, higher waste
Digital Integration	Optimized for 3D-printed denture bases; seamless digital workflow	Not designed for digital workflows
Longevity	Lasts up to 1 year or more	3-6 months
Durability	Exceptional tear strength, long-term resilience	Prone to cracking and becoming brittle
Comfort	Maintains elasticity and softness over time	Hardens and loses comfort quickly
Odor/Taste	Neutral, no offensive odor or taste	Often associated with unpleasant odor/taste over time
